This SDS packet was issued with item:
075897806

The safety data sheets (SDS) in this packet apply to the individual products listed below. Please refer to invoice for specific item number(s).

073650017 075897814 075897822 075897830 075897848 075897855
Pulpdent Corporation
Safety Data Sheet
Revision Date: July 1, 2015

Trade Name: Etch Royale, 37% Phosphoric Acid Etching Gel

1.0 Commercial Product Name and Supplier
1.1 Commercial product name / designation
Etch Royale, 37% Phosphoric Acid Etching Gel
1.2 Application / Use
Dental etching gel for use by dental professional only.
1.2.2 SIC
851 Human health activity
1.2.3 Use Category
55
1.3 Manufacturer
Pulpdent Corporation
80 Oakland Street, P.O. Box 780
Watertown, MA 02472 USA
Telephone: 1 617 926-6666; Fax: 1 617 926-6262
Email: Pulpdent@pulpdent.com
1.4 Emergency Telephone Number
1-800-535-5053 (24 Hour Emergency / USA)
1.5 Authorized European Representative
Advena Ltd.
Pure Offices, Plato Close
Warwick, CV34 6WE
United Kingdom

2.0 Hazards Identification

2.1 Classification
2.1.1 Classification according to Regulation (EC) No. 1272/2008 [CLP]
Hazard Class
Skin corrosion
Hazard Category
1B
Hazard Statement
H314
Eye irritation
2
H319

2.1.2 Classification according to Directive 67/548/EEC
(See SECTION 16 for full text of risk phrases)
Corrosive (C); R 34; R 36 / 37 / 38

2.2 GHS Label Elements
Hazard Pictograms

Signal Word: DANGER
Restricted to use by dental professional only.

Hazard Statements
H314: Causes severe skin burns and eye damage.
H319: Causes serious eye irritation.

Precautionary Statements
P264: Wash hands thoroughly after handling.
P280: Wear protective gloves, clothing and eye/face protection.
P301 + P330 + P331: If swallowed, rinse mouth. Do NOT induce vomiting.
P303 + P361 + P353: If on skin (or hair), remove all contaminated clothing. Rinse skin with water.
P363: Wash contaminated clothing before reuse.
P310: Immediately call a Poison Center or doctor/physician.
P305 + P351 + P338: If in eyes, rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing until pH of tears is 7.

3.0 Composition
3.1 Chemical characterization of the preparation
Phosphoric acid in a gel matrix.
Hazardous ingredients

4.0 First Aid Measures

4.1 General Information

May cause burns or irritation to eyes, skin or mucous membranes. Acute effects may be delayed. Show this safety data sheet to medical personnel. Get medical attention in case of uncertainty.

4.2 Eye Contact

Remove contact lenses. Keep eyelids apart and flush with running water for 15+ minutes or until pH of tears is 7. Get medical attention.

4.3 Skin Contact

Immediately flush skin with running water for 15 minutes. Get medical attention for persistent irritation or burns.

4.4 Ingestion

Rinse mouth with water. Do not induce vomiting. Give water to dilute. Get immediate medical attention. Never give anything by mouth to an unconscious person.

4.5 Inhalation

Move to fresh air. If necessary, administer oxygen and/or artificial respiration and seek medical attention.

4.6 Precautions for first responders

Ventilate the area. Wear safety glasses, gloves and lab coat.

4.7 Information for physicians

Symptoms

Irritation, pain or redness in eyes, mucous membranes or skin. Acute effects may be delayed so continued monitoring of the patient is indicated.

Hazards

May cause burns or irritation to eyes, skin or mucous membranes. Acute effects may be delayed.

Treatment

Same as above under First Aid.

5.0 Fire Fighting Measures

5.1 Suitable extinguishing media

Not a fire hazard. Use water spray to keep fire-exposed containers cool. Extinguish fire with agent suitable for surrounding fire.

5.2 Extinguishing media to avoid

None

5.3 Special exposure hazards in a fire

Phosphoric acid can react with metals to liberate hydrogen, a flammable gas. Combustion by-products include oxides of phosphorus.

5.4 Special protective equipment for firefighters

A self-contained breathing apparatus should be worn by firefighting personnel.

6.0 Accidental Release Measures

6.1 Personal precautions

Wear chemical splash goggles and gloves.

6.2 Environmental precautions

Avoid releasing large quantities into the environment as phosphoric acid may affect pH of water or soil.

6.3 Method for clean up

For small quantities (as in this product): Wear safety glasses, lab coat and gloves. Absorb or wipe up spill with dry paper towels. Place all material in covered chemical waste container for disposal. Flush spill area with water.
7.0 Handling and Storage

7.1 Handling
For use by dental professionals only. Wear safety glasses and gloves; wash hands after use. Avoid unnecessary exposure. Follow good hygiene practices. Protect soft tissue from etchant during intraoral procedures.

7.2 Storage
Remove applicator tip after use. Keep tightly capped in original container. Store at cool room temperature. Avoid extremes of temperature (>27°C/80°F, <5°C/40°F), alkalis, sulfites, sulfides and most metals.

7.3 Specific uses
Dental etchant

8.0 Exposure Controls / Personal Protection

8.1 Exposure limit values
TWA: 1 mg/m³ TLV: 3 mg/m³

8.2 Exposure controls

8.2.1 Occupational exposure controls
No special equipment required under normal conditions of use of this product in the quantity provided.

8.2.1.1 Respiratory protection
Good general ventilation is sufficient to control airborne vapors.

8.2.1.2 Hand protection
No special requirements other than surgical gloves.

8.2.1.3 Eye protection
No special requirements other than safety glasses.

8.2.1.4 Skin protection
No special requirements. Good personal hygiene and safety practices, wearing a lab coat will protect from unnecessary exposure to etchant.

8.2.1.5 Other controls
Emergency eye wash fountain should be available. Protect soft tissue from etchant during intraoral procedures. Wash hands after use.

8.2.2 Environmental exposure controls
Avoid releasing large quantities of phosphoric acid into the environment as phosphoric acid may affect pH of water or soil.

9.0 Physical and Chemical Properties

9.1 Appearance / Color

9.1.1 Color / Physical state
Dark blue gel

9.1.2 Odor
Mild, characteristic

9.2 Important health, safety and environmental information

9.2.1 pH
pH 1

9.2.2 Boiling point
135°C

9.2.3 Flash point
Not combustible

9.2.4 Flammability (solid, gas)
Not combustible

9.2.5 Explosive properties
Not applicable

9.2.6 Oxidizing properties
Not determined

9.2.7 Vapor pressure
2.933 mbar / Id: C

9.2.8 Specific gravity
1.300

9.2.9 Solubility in water
Complete

9.2.10 Partition coefficient
Not determined

9.2.11 Viscosity
Not determined
Safety Data Sheet

Trade Name: **Etch Royale, 37% Phosphoric Acid Etching Gel**

9.2.12 Vapor density Not determined
9.2.13 Evaporation rate Not determined

**10.0 Stability and reactivity**

10.1 Conditions to avoid Not applicable
10.2 Materials to avoid Avoid contact with materials such as sulfides and sulfites that could release toxic gases. Avoid strong alkalis because high heat of reaction can generate steam. Avoid most metals because phosphoric acid can react to liberate hydrogen, a flammable gas.

10.3 Hazardous decomposition products Avoid contact with materials such as sulfides and sulfites that could release toxic gases. Avoid strong alkalis because high heat of reaction can generate steam. Avoid most metals because phosphoric acid can react to liberate hydrogen, a flammable gas.

10.4 Further information Stable under normal conditions of use and storage.

**11.0 Toxicological information**

11.1 Acute toxicity Not toxic
11.2 Irritation and corrosiveness Corrosive. May cause burns or irritation to eyes, skin, mouth, throat or gastrointestinal tract. Not expected to be an inhalation hazard unless product is misted or heated at high temperatures.

11.3 Sensitization Not applicable.
11.4 Sub-acute, sub-chronic, prolonged toxicity None known.
11.5 Carcinogenicity, Mutagenicity, Reproductive Toxicity Not considered a carcinogen, mutagen, teratogen or reproductive toxin.
11.6 Empirical data Not available
11.7 Clinical Experience Using phosphoric acid etchants to prepare teeth for bonding procedures is a well-established (more than 20 years), industry-accepted, dental procedure. Etching enamel with phosphoric acid is safe and effective treatment in the hands of a dental professional.

**12.0 Ecological Information**

12.1 Ecotoxicity No specific information available. Use according to good working practices. Avoid release into the environment as it may cause pH variation.

**13.0 Disposal Considerations**

13.1 Regulations Follow all local and national government regulations in disposing material or contaminated packaging.

**14.0 Transport Information**

14.1 UN Number 1805
14.2 Technical name Phosphoric acid
14.3 Packing group Packing Group III
14.4 IATA class Class 8, Corrosive
